Key Points and Issues For September 2010

Director's Note

- The world markets could be characterized for September with two words, "nervous ebullience". On the two year anniversary of the start of the world equity and credit market crash, the S&P 500 had its best September since 1939. What's even more remarkable is that the performance is in the face of continued domestic unemployment concerns, a U.S. dollar on the brink of a 15 year low, and concerns about quantitative easing in the United States. Even more impressive was the performance of overseas stock markets. The MSCI world index was positive 9.88%, while the MSCI emerging index was positive 11.34%. Domestic Equities, International Equities, High Yield, TIPS, Commodities and Cash Management generated positive returns as the financial markets rebounded from the prior month.
- The pension fund's estimated return was up 4.19% versus the Council benchmark estimated return of 4.13% for the month of September. For the quarter ended September 30, 2010, the return for the pension fund was estimated 8.27% versus the Council benchmark's estimated return of 8.41%. The estimated market value of the fund was \$70.2 billion as of September 30, 2010. We estimate that net benefit payments (i.e., net cash outflows) from the fund for September were approximately \$600 million.

Domestic Equity

- Domestic equities in Common Pension Fund A participated in the overall market gains in September, gaining 9.41%, versus the S&P 1500 gain of 9.21%. The Fund's strength came primarily from the overweighted technology sector which gained 13.79%, helped by gains in Apple, Atmel and Tyco Electronics. AirTran Holdings also contributed positively to results after Southwest Airlines offered to buy the company at a 73% premium. The Fund owned over 3% of AirTran's common stock.
- Common Pension Fund A is outperforming its benchmark for CY2010 and FY2011. The Fund is up 5.16% CY2010 to date and 11.68% FY2011 to date. Comparatively, the benchmark S&P 1500 was up 4.67% and 11.39% for these same periods.
- Common Pension Fund A was a net seller of \$412 million of equities in September. Many of these gains were timed to take advantage of the recent strength in the transportation sector. The Fund was a buyer of AT&T during September, taking advantage of the stock's 6% dividend yield.

Domestic Fixed Income

- Performance for Common Pension Fund B for September was down 0.14%. Excluding the TIPS and high-yield positions, performance was down 0.38% versus -0.71% for the Barclays Long Government/Credit Index. For the calendar year-to-date, Common Pension Fund B (excluding TIPS and High Yield) returned 15.85% versus 16.69% for the Barclays Long Government/Credit Index. The duration of Common Pension Fund B (excluding TIPS and High Yield) was 11.32 years as of September 30, 2010.
- The High Yield portfolio was up 1.13% for September versus 3.01% for the Barclays High Yield Index. The High Yield portfolio was up 9.21% for the calendar year-to-date versus 11.53% for the Barclays High Yield Index. The TIPS portfolio returned 0.48% in September versus 0.60% for the Barclays TIPS Index, and was up 11.61% for the calendar year-to-date versus 7.00% for the Barclays TIPS Index.
- Within domestic fixed income, we were net sellers of \$14.99 million in domestic fixed income in September, consisting of purchases of \$437.77 million and sales of \$452.76 million.

International Equity/Fixed Income

- For the month of September, equities worldwide experienced a strong rebound versus August, on the back of better-than-expected economic data (China's PMI, US manufacturing, consumer confidence and consumer spending). Diminished concerns over the European sovereign debt situation added to the renewed appetite for risk. The rally was led by the Developed Markets in Europe and Non Japan Asia, followed by the Emerging Markets, especially in Asia. A surprising intervention effort by the Bank of Japan to curb the Yen's strength did not translate into a better performance for the Japanese market, which lagged the returns of its developed peers. Regarding currencies, on a trade-weighted basis, the USD fell to a 10-month low during September as the uncertainty of a sustained US economic recovery continued to add pressure on the Federal Reserve to engage in greater quantitative easing measures.
- Performance for Equity Positions in Common Pension Fund D for September was 9.29% versus 9.88% for the Custom International Equity Index, the benchmark for the international portfolio.
- Europe, which is slightly overweight relative to the benchmark, was the best performing region on an absolute basis, adding 456 basis points positive contribution to return for the month. Asia/Pacific ex-Japan, the most underweight region in the portfolio, produced the second largest absolute positive contribution to return at 207 basis points. Japan, which is marginally underweight to the benchmark, produced an absolute positive contribution to return of 71 basis

points, a performance that was slightly better relative to the benchmark. At the country level, France, Germany and Japan were the strongest positive contributors with 117, 82 and 71 basis points in absolute contribution respectively. Relative to the benchmark, the UK, Australia and Spain were the largest negative contributors at 68, 35, and 22 basis points respectively.

 Financials and Industrials were the largest absolute positive sector contributors to return while the Financials sector, due to its large underweight versus the benchmark, as well as the Materials and Energy sectors, negatively impacted our relative returns.

Alternatives

- The commodity portfolio was up 7.05% as compared to 7.26% for the Dow Jones UBS Total Return benchmark. For the calendar year-to-date, the commodity portfolio returned 2.42% versus 0.90% for the benchmark.
- The Hedge Fund portfolio returned 0.87% for the month of September versus its benchmark, HFRI Fund of Funds Composite Index of 2.44%. We received a partial redemption of \$4.5 million during the month of August. (Data available as of 8/31/2010).
- We funded approximately \$194.8 million of commitments to private equity and real estate investments in September 2010. Additionally, we received distributions of approximately \$50.6 million during the month. The major investment for the month was \$21.7 million into a real estate separate account.

Cash Management Fund

• Total assets in the Cash Management Fund were \$12.9 billion as of September 30, 2010. The current yield is 0.31% for state participants and 0.21% for "non-State" participants.

Additional Items

• Common Pension Fund E's investment in Centerbridge Capital Partners was originally classified as "Buyout Investments" under N.J.A.C. 17:16-90.2(a). The fund is a multi-strategy investment fund that focuses on private equity and distressed security investments during economic slowdowns and general market instability. The current mix of the fund is approximately 60% credit investments and 40% portfolio company investments. A portion of the portfolio company investments were obtained through the purchase of debt securities. Based upon the current structure of the fund, the Division believes the investment in Centerbridge Capital Partners should more appropriately be classified as "Debtrelated Investments" and will report it as such prospectively.

Agenda Item 2(a) Director's Report – September 2010 Page 4 of 4

• Common Pension Fund E's investment in TPG Financial Partners, L.P. was originally classified as "Buyout Investments" under N.J.A.C. 17:16-90.2(a). The fund was launched in early 2008 as a financial services fund seeking to make investments in control and non-control financial services assets in light of the turmoil in the financial services sector. However, at the end of 2008 the federal government's intervention in the financial services sector had lowered return expectations and decreased the opportunity set to invest. As this became evident, TPG and its investors agreed that a reduction of the fund and change in investment strategy would be favorable. The investment strategy was then changed to investing in debt, which was a small portion of the original fund, including secondary market sales of securities, claims or other assets. Based upon the current structure of the fund, the Division believes the investment in TPG Financial Partners should more appropriately be classified as "Debt-related Investments" and will report it as such prospectively.
